

# An Interview with Amelia Earhart

Pioneering pilot Amelia Earhart was the first female pilot to fly solo across the Atlantic Ocean in 1932. Amelia displayed enormous courage during her flying career, taking on challenges that had never been tried before, often in dangerous conditions. Amelia was brave in other areas of her life too. For example, she challenged the perception of the time that only men were good enough to be pilots.

If you had the opportunity to meet Amelia Earhart, what would you like to ask her? Use the boxes below to plan out your interview with her. If you like, you can pretend to be Amelia and research the questions to be able to answer them from her point of view.
